3. Objective(s):
Strategic Objectives

A full suppression strategy is to be implemented on the County Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient tactics while maintaining safety first.

Leaders Intent

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct timely/effective communications
- Personal safety and safety of others, including driving slowly, safely and defensively
- Implementation of tactics that offer a high probability of success
- Manage fatigue by taking breaks and maintaining work/rest cycles

Management Objectives

- Fight fire aggressively while maintaining safe work practices to minimize threats to the public and emergency responders
- Minimize damage to structures, private property and other improvements in the fire area
- Protect natural, cultural, heritage resources
- Continue to foster and maintain positive relationships with all local cooperators and stakeholders
- Provide timely and accurate incident information
- Maintain fiscal accountability keeping costs commensurate with values at risk

Control Objectives

- Keep the fire South of Highway 20
- Keep the fire North of Miller Canyon
- Keep the fire East of Knoxville Road
- Keep the fire West of Highway 16

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

Stop, Think, Organize, Proceed

County Fire Incident Weather Forecast

FORECAST NO: 4 D/N
PREDICTION FOR: Thursday - 24 Hour Shift
SHIFT DATE: July 5, 2018
FORECAST ISSUED: 2000 PDT July 4, 2018

NAME OF FIRE: County Fire
UNIT: LNU
Incident Meteorologist: Jeff Tonkin

WEATHER DISCUSSION: An upper trough of low pressure will slowly give way to building high pressure from the east. The cool moist onshore flow will cease...allowing a much warmer and drier air mass to develop over the region. A gradual but significant rise in temperature and drop in both daytime and nighttime humidity is expected to begin today with peak values occurring this weekend. The general south and southwest wind flow will continue today but wind speeds should be slightly less than yesterday.

WEATHER FORECAST TODAY (THURSDAY DAY SHIFT):

SKY/WEATHER: Sunny...warmer and drier.
MAX TEMPERATURES: 77 - 82...85 - 90 east perimeter.
MIN HUMIDITY 2000 ft: 26 - 32%.
WINDS (EYE LEVEL): South and southwest 3 to 6 mph until noon...then increasing to upslope or southwest 5 to 10 mph with gusts to 15 to 20 mph through the evening hours.
LAL: 1 CWR: 0%
STABILITY / INVERSION: Moderately Unstable.
SMOKE TRANSPORT WIND: South-southwest 30 mph.

WEATHER FORECAST THURSDAY NIGHT:

SKY/WEATHER: Low clouds and smoky through the morning hours.
MIN TEMPERATURES: 49 - 54.
MAX HUMIDITY: 60 - 70%.
WINDS (EYE LEVEL):
South and southwest 10 to 15 mph with locally higher gusts to 20 mph through midnight. Winds then diminishing to 3 to 6 mph through sunrise.

OUTLOOK FOR FRIDAY: Sunny and warmer...and much lower rh's. Max Temps: 87 - 92. Min RH: 17 - 22%. Wind: Upslope or southwest 4 to 8 mph. Gusts to 15 mph from 1300 PDT to sunset.
Smoke Transport Wind: South-southwest 35 mph.

EXTENDED FORECAST SATURDAY THROUGH MONDAY: Mainly clear and becoming hot and dry again. Max Temps 96 - 101. Min RH 10 - 16%. Mainly west winds or upslope 5 to 10 mph.
Smoke Transport Wind: Southwest 30 mph.

OBSERVED WEATHER FROM YESTERDAY (WEDNESDAY):

<u>RAWS</u>	<u>MAX TEMP</u>	<u>MIN RH</u>	<u>WIND DIRECTION</u> / <u>SPEED MPH</u>
BROOKS	81	38%	Southwest / 10 Gust 20

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 5, 2018
	TIME ISSUED: 2000
UNIT: CAL FIRE-Sonoma Lake Napa	Jon Heggie Fire Behavior Analyst

INPUTS

WEATHER SUMMARY:

Daytime: Sunny with temps near 85°-90° and minimum relative humidity between 26%-32%.

Winds will vary by position on slope and time of day. Please review incident weather forecast.

Night time: Smokey with temps near 49°-54° and maximum relative humidity between 90-100%. Winds will vary by position on slope and time of day. Please review incident weather forecast.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The window of cooler weather will begin to close today. This slight cooling trend had very little effect on fire behavior as fuels are burning with late season intensity. The south wind will be in alignment with the active branches of the incident and push the fire into heavier fuels. The sustained drought has deposited an extreme dead load within all fuel models adding to fire growth. The expected fire behavior this operational period is for moderate growth, but if fire becomes established with wind and slope alignment fire activity will increase.

Probability of Ignition 70-80%

Spotting Distance ½ mile

Fine Dead Fuel Moisture 3-4%

SPECIFIC:

Branch II

Most of fire activity on this branch has been concentrated towards the north. The fire continues to make slope reversal runs with high intensity. The fuels have transitioned from oak grass woodland to heavy brush. As the fire moves towards Rumsey Canyon, the canyon becomes narrow and Hwy 16 may be challenged by active fire. The rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush were wind and slope align. Torching trees can send ember cast up to ½ mile.

Branch IV

The branch is expected to have minimal fire activity as successful burning operations have tied in most of the branch. Isolated pockets of green may become active as solar radiation heats up ground fuels. This branch is mainly grass oak woodland with some brush fields. 1000 hour fuels may dislodge and roll into receptive grass outside of control lines. The rates of spread in the grass can exceed 175 ch/h and 125 ch/h in the brush were wind and slope align.

Branch VI

Fire activity is expected to be minimal as a successful burning operation has eliminated most opportunities for growth. Some interior pockets of unburned fuel may be become active and rollout will remain a concern along the Hwy 128 corridor. If fire escapes control lines it will find dry grass that can have rates of spread more than 175 ch/h. and 125 ch/h were wind and slope align.

Branch VIII

The fire behavior is expected to be very active with slope reversal runs in heavy fuels. Torching trees can send ember cast up to ½ mile. The afternoon south wind may push the fire up the Knoxville Rd corridor with dangerous rates of spread. The rates of spread in the grass can exceed 200 ch/h and 150 ch/h in brush were wind and slope align.

Branch X

Heavy fire activity is expected below this branch for this operational period. Heavy fuels aligned with south winds will push the fire to the north towards Hwy 40. Spotting from large column development may out pace ground and air resources. Indirect line construction must monitor fire conditions for accelerated spread compromising escape routes. The rates of spread in the grass can exceed 200 ch/h and 150 ch/h in brush where wind and slope align.

AIR OPERATIONS: Smokey conditions may limit the view ground resources near drops.

SAFETY

- Utilize P.A.C.E on all operations.
- Spot fires will establish rapidly, have an escape route for all situations.
- Fuels are burning 2-3 months ahead of seasonal averages.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:	2. DATE PREPARED:	3. TIME PREPARED:

SAFETY MESSAGE

Situational awareness is being aware of what is happening around you in terms of where you are, where you are supposed to be, and whether anyone or anything around you is a threat to your health and safety.

- Accountability – Know where and whom you are working for and be on time.
- Provide sufficient rest during the work cycle.
- Make sure everyone gets a briefing on the plan for the day!
- Watch for increase in traffic and congestion. Stay focused on driving safely.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert to changes in wind direction and expect changes in fire behavior.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

SNAG (Hazard Tree) SAFETY:

Size up snag hazards in work area
Never become complacent
Always look up
Get weather reports
Scout out parking, work areas, and safety zones
Advise co-workers of known hazards
Face your hazards and take appropriate action
Examine work area for other hazards
Take extra caution around heavy equipment
You are responsible for your own safety

INCIDENT RISK ANALYSIS ICS 215A

BRANCH	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines IRPG (p. 22). Many of the trees within the fire area and along roadways are stressed. Snags are present. Be aware that trees may fall even if not impacted by the fire.
DIV C, D, S BRN IV, VI	MOP UP	<ul style="list-style-type: none"> Do not get complacent during mop up. Watch your footing. Wear your PPE.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Watch your speeds. Watch for debris in roadways. Expect increased civilian traffic in the populated areas.
ALL	WEATHER	<ul style="list-style-type: none"> Hot and dry weather will continue. Watch for changing weather conditions. The local pattern is a daily afternoon wind shift. Stay prepared.
ALL	PERSONNEL SAFETY	<ul style="list-style-type: none"> All personnel are responsible for their personal safety. Be sure to wear all required PPE while on the fire line. Be cautions of snakes and yellowjackets within the fire area.
ALL	POWER LINES	<ul style="list-style-type: none"> Follow Power Line safety guidelines IRPG (p. 24). Treat all downed power lines as energized.
ALL	HYDRATION	<ul style="list-style-type: none"> Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	FATIGUE	<ul style="list-style-type: none"> Monitor incoming and outgoing resources for level of fatigue. Provide sufficient rest during the work cycle.
ALL	CIVILIAN PRESENCE	<ul style="list-style-type: none"> Be aware of civilians in the area. Civilians may be distracted by the fire operations. Stay alert.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Check the communication plan for frequency assignments. Use human repeaters as needed.
ALL	BRIEFINGS	<ul style="list-style-type: none"> Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	LCES	<ul style="list-style-type: none"> Ensure that LCES is being utilized.
ALL	AIRCRAFT AWARENESS	<ul style="list-style-type: none"> Be aware of rotor wash when working near helicopters. Understand that hazard trees may react to helicopters overhead. Monitor assigned aircraft frequencies.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Maintain situational awareness. Be prepared for extreme fire behavior in all presented fuel types. Live fuel moistures are Critically Low.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Review IRPG (p. 80). Provide working space around equipment. Avoid working below equipment where rollout is a potential.
BRANCH II, VIII	FIRING OPERATIONS	<ul style="list-style-type: none"> Utilize Risk Management Process IRPG (p. 1). Ensure that Firing check list is complete

Incident_____ Firing Plan

OVERVIEW

A burn operation will be utilized to complete fire line in the area of _____. Firing will be initiated on _____ at _____ hours if all burning conditions are favorable and necessary control lines are in place.

INCIDENT AUTHORITY 7013.4.2

(No. 1 November 2005)

The Incident Commander has the overall authority and responsibility to set a backfire or burn should the need exist. As the incident organization expands, the responsibility and authority to backfire or burnout may be delegated. A normal progression of delegation, depending on the complexity of the incident, would be from the Incident Commander to the Operations Section Chief and could extend down to the Branch Director, Division Supervisor, Strike Team Leader, Task Force Leader or Single Resource.

Safety will be the first priority. All personnel will closely follow the 10 standard Fire Fighting Orders, 18 Watch Out Situations, and LCES. A qualified firing group supervisor working under the direction of the Branch Director/ Division Supervisor and Operations Chief will supervise firing operations.

The following general guidelines will be followed:

- Firing will move as fast as dictated by the current conditions.
- Only those areas necessary for successful fire control should be ignited.
- Weather will be monitored continuously for changes.
- The firing group supervisor will use all necessary-firing devices. Aerial ignition will be used only as necessary to support hand firing.
- Adjacent divisions will be briefed and if aerial ignition is used, all crews working in the vicinity will be briefed on safety procedures of aerial ignition. Supervisors will verify crews have been briefed, by their signature on the firing plan.
- Crews will be prepared for a long shift (16+ hours) to complete operation.
- Contingency lines will be identified but will not be constructed unless needed.
- A test fire will be conducted prior to beginning operations.

GO / NO-GO

- ☐ All personnel briefed
- ☐ Weather Forecast Reviewed
- ☐ Resources in place
- ☐ Lookouts posted

- ☐ Communications systems in place
- ☐ Escape Routes established and made known
- ☐ Fire Behavior is within recommended parameters
- ☐ TEST FIRE IS FAVORABLE

TEST FIRING PLAN

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area. The test burn will be conducted from one ignition point only and left to burn to evaluate if burning conditions are appropriate. The test fire will be evaluated and a go or no-go recommendation will be given to the IC.

Communications:

A radio net announcement at the incident will be made prior to backfiring and/or burnout. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned.

Except where immediate firing is necessary to prevent the loss of life or major property damage, all firing operations shall be communicated to the appropriate ICS supervisor prior to the commencement of the firing operation. The officer supervising the firing operation shall remain in communication with his/her ICS supervisor and adjoining forces to the extent possible.

Constraints:

Firing should occur in such a manner to minimize escapes and provide for firefighter safety.

Slop over and Escapes:

If an escape/slop over occurs the Firing Group Supervisor will notify the Division Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

Perimeter Firing Sequence:

The perimeter firing will proceed as follows:

☐ **Conditions:**

Desired weather conditions:

☐ **Sequence of Firing:**

1. Ignition will begin at anchor point _____
2. _____
3. _____
4. _____
5. _____

CAL FIRE INCIDENT MANAGEMENT TEAM 3

TRAINING SPECIALIST MESSAGE

A Training Specialist is now assigned to the County Incident.

All assigned trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive documented credit for your assignment.

If you were reassigned from the Pawnee Incident and did not get a chance to close out with training, please see the TNSP to complete your training packet.

Bring the following with you to register:

- Incident Qualification Card
- Initiated Position Task Book

Rob Scott TNSP 949-292-3207

Justin Voyson TNSP-T 661-547-8629

Update

409.5

MEDIA – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

In readiness is all

COUNTY INCIDENT FINANCE SECTION MESSAGE

SHIFT TICKETS / HIRED EQUIPMENT VENDORS:

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

FEDERAL TIME:

Federal agency timekeepers are on site and available to assist our federal government cooperators with personnel and equipment time.

LOCAL GOVERNMENT TIME KEEPING:

The CAL OES representative is on site to handle F-42 and any questions you may have. If you are a local government cooperator from the Sonoma-Lake-Napa Unit (including Yolo County), please check in with the CAL FIRE Time Unit.

SUPPRESSION DAMAGES:

Please report all fire suppression damage to the Comp Claims Unit Leader. We will need location, lat/long, property owner, type of damage, etc. Examples of "fire suppression damage: Damaged fence, crush culverts, pipe damage, broken gates, etc.

ALL FINANCE FUNCTIONS ARE LOCATED IN THE "HOME ARTS" BUILDING NEAR THE OVER HEAD PARKING AREA

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.

**ROGER RAINES, FSC1, IMT3
MARA ZAVER, FSC1, IMT3**

****Please note PROPERTY OWNER AND CONTACT NUMBER! (Use reverse side if needed.)**

The intent of this document is to track, record and validated the amount of water used on an incident. It's not intended to review the performance of equipment using the water on an incident.

In readiness is all

FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

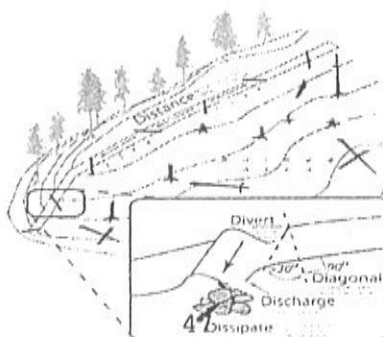

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocky areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

**Archaeological and Historic Properties:
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

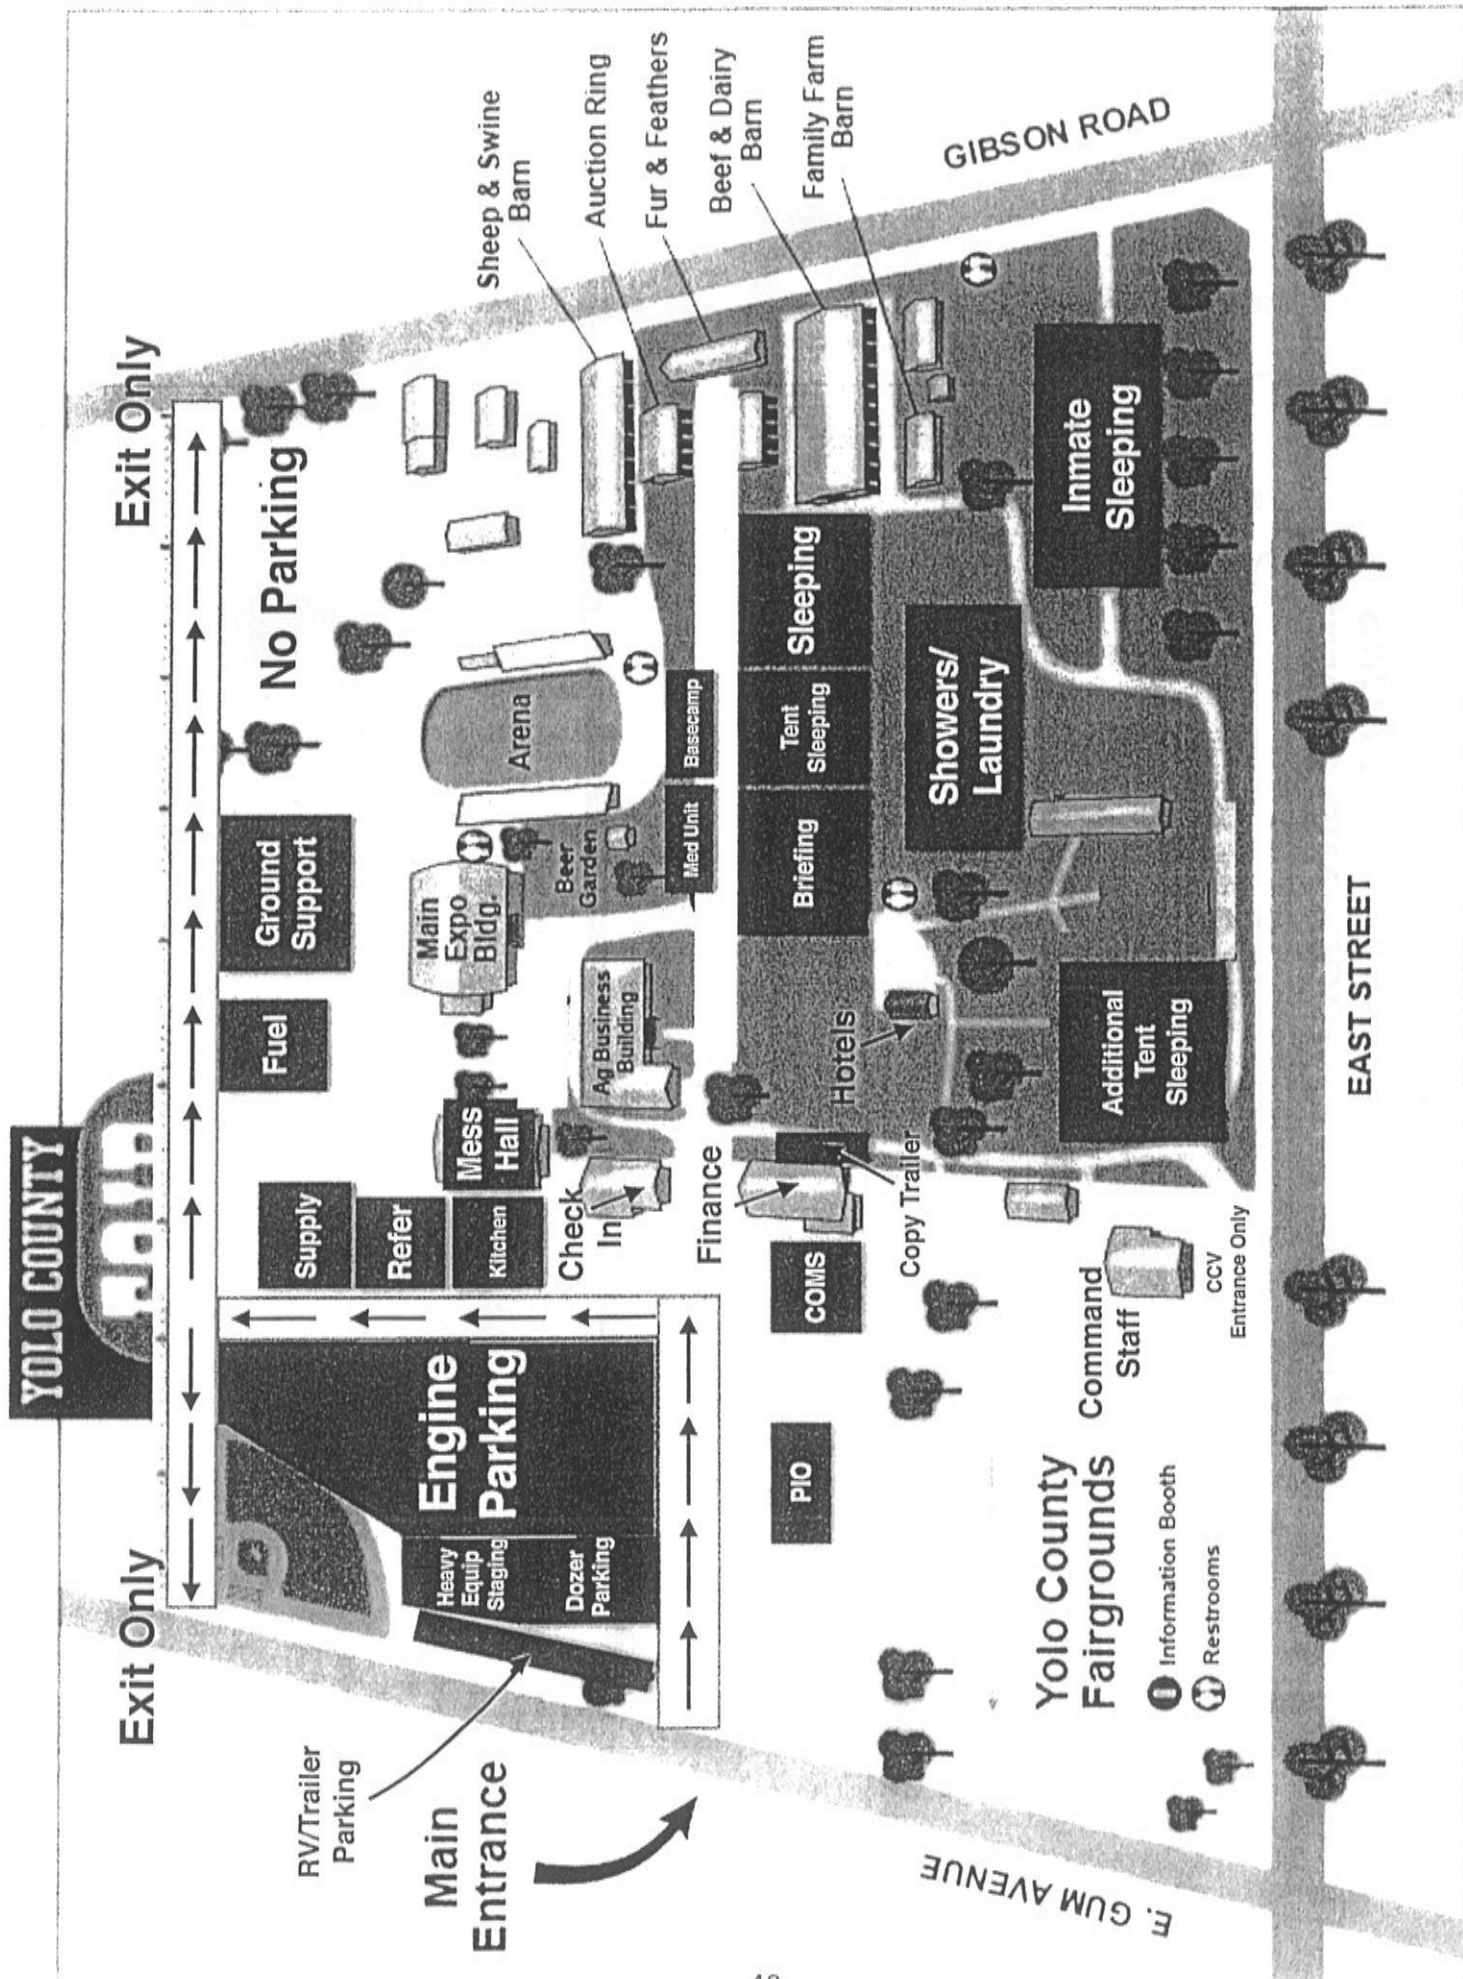

Your help preserving California's non-renewable cultural resources is appreciated.
